After doing this Pass Task 1, I understood a lot of things like how to use body to make form, table and use image to add to my html page. Also, I know more about css like inline styles, internal styles and external styles. I have sat around and learned about these new knowledge through lectures as well as course materials and after learning and studying, I feel that I have become much more confident with my html knowledge. from the smallest things like naming files with indexes, adding !DOCTYPE, and many more useful things.
